zitKO.IN

MOON
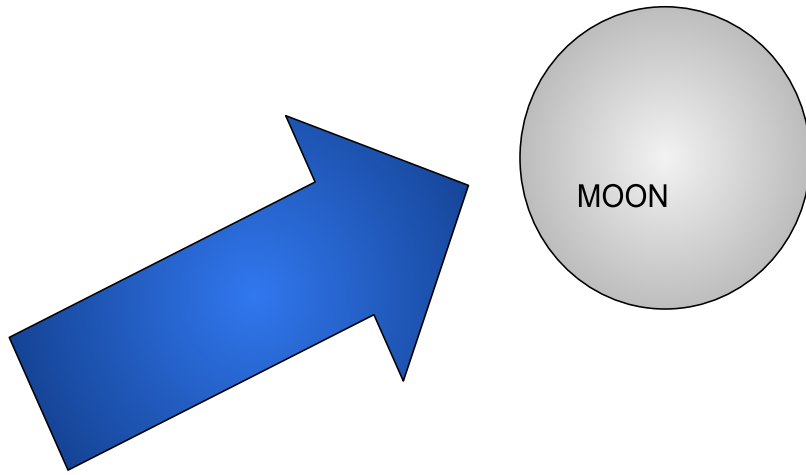

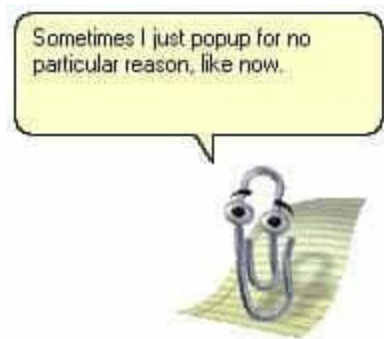

Abstract

During the last year I've discovered this amazing technology called blockchain. I'm in the space from 2012 though, so you better believe me, because I'm in it for the technology.

zitKO.IN will help me reach my life aspirations and it might help you too – it probably won't but you have to try right!

Introduction

Blockchain technology is amazing. It enables anyone to instantly become a millionaire, because to be a billionaire you'd need a car with doors that open like this:

Figure 1: Doors like this

Technology

We use state of the art design and technology. We like Ethereum. ZitKOIN is an ERC20 token, i mean coin, emmm koin„ so that's it. There is no other product, but I can write a few more lines of text here, because it is expected of me from me to give my best to this project. To be honest I really wanted to make this project amazing by like everything else I do this is mediocre.. Just kidding I did some OK stuff before, but this technology section is hard man. Writing code is easy, but this whitepaper took me full hour man. JK, maybe 20min.

ICO

This ICO will help me achieve the following:
1. Raise money

When?
15.3.2018 we start the ICO

How much?
<mark>15 Million ~~dollars~~ euros</mark>

Why so much?
Because I deserve nice things in life
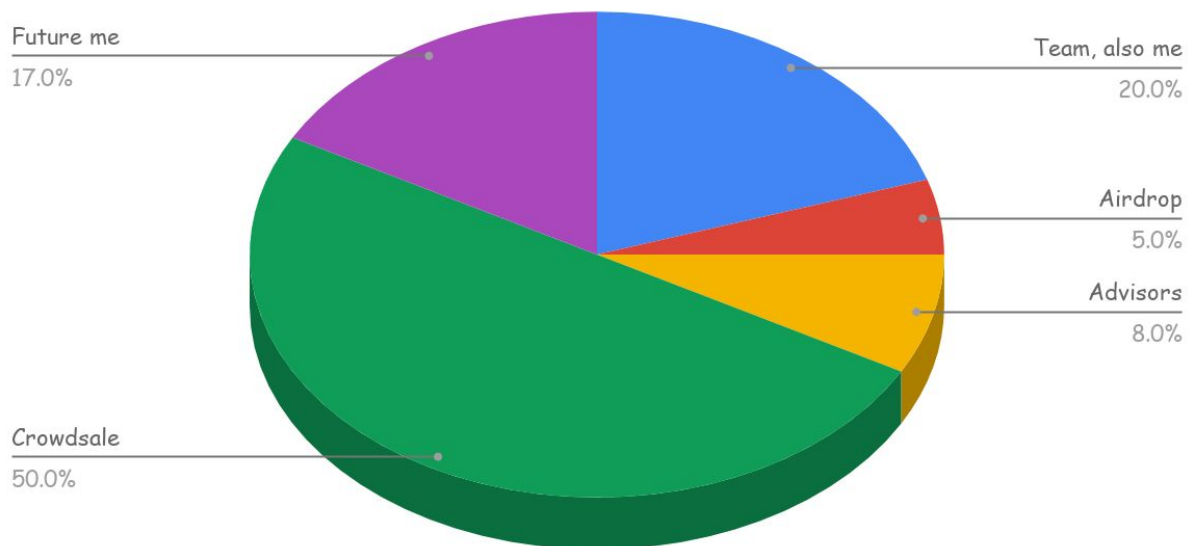

Token?
Symbol: XZT
Supply: 1 Billion
Type: ERC20
Locked: YES, until the end of ICO.

Sometimes I just popup for no particular reason, like now.

Distribution
